REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The invention as claimed, the claim 1 includes a limitation based upon conversion means for selecting a conversion rule conforming to a network technology and automatically converting the action parameters (such as a requested bandwidth, a monitor request, a duplex switching request) to network -technology –dependent parameters (parameters are parameters dependent upon the network such as ATM, SDH, FR, IP, for example) using the selected conversion rule. While a communication network system for converting parameters is firmly documented by the cited prior art, the feature "conversion means for selecting a conversion rule conforming to a network technology and automatically converting the action parameters (such as a requested bandwidth, a monitor request, a duplex switching request) to network-technology-dependent parameters (parameters are parameters dependent upon the network such as ATM, SDH, FR, IP, for example) using the selected conversion rule" is novel and the invention is patentable,

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title of the invention is changed to: **"Communication Network Management System for Automatically Converting Action Parameters to Network Technology Dependent Parameters using a Selected Conversion Rule Conforming to a Network Technology"**.
